

YOUTHFULNEST

NYC Skyline Mural Stencil Step-By-Step Instructions

STEP 1

Items you'll need:
scissor
painters tape
pencil
paint brush
paint
drop cloth
Optional: Roller brush & Magic Eraser

STEP 5

Using painters tape, mask off the outline of each building shape along the outer edge of the pencil line so pencil disappears once painted.

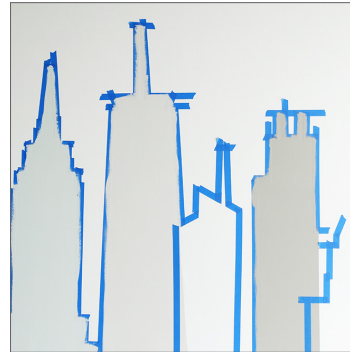

Note: Use scissors or a utility knife to CAREFULLY cut out curves.

STEP 2

Using a scissor, cut out each building shape on the dotted line.

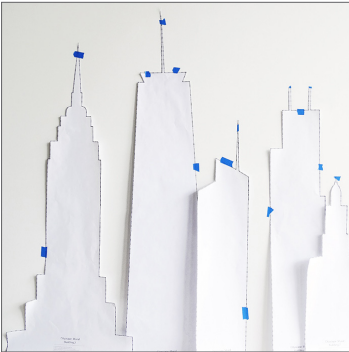

Note: Cut out just those stencils that you plan to use. You can always cut out additional shapes as you go.

STEP 6

Apply two coats of desired latex paint color.

Note: Depending on the number colors in your design, you should only need quart size or sample size cans of each color.

STEP 3

Using painters tape, tack up each building in the desired position.

Note: Overlapping buildings creates depth and visual interest.

STEP 7

Remove the tape right away after painting second coat.

Note: Wait 2-4 hours for the paint to dry before using a Magic Eraser to remove any visible pencil lines.

STEP 4

With a pencil, carefully trace the outline of each building.

Note: Be sure to draw dark enough to see the entire building outline. When finished with all buildings remove the paper stencils.

STEP 8

Move in furniture once paint is dry, about 2-4 hours.

Note: Sit back and enjoy your awesome work and new room with a view!
